

NANO SILVER:

Our silver is not like most silver. Most silver available on the market today contains silver ions. That type of silver is in an atomic state and has no crystalline structure. Our silver technology contains a nano-sized crystalline metallic core made of .9999 pure silver, surrounded by a silver-oxide coating (silver and oxygen combined together). This skin-like coating gives the silver its stability and unique properties unlike any other silver technology. This creates nanostructured spherical silver in a form that is perfectly suitable for human consumption.

Our Spherical Silver Nanoparticles have the size and shape (7-10nm spheres) needed to:

- Support a healthy immune system*
- Move safely and effectively throughout the whole body*
- Be applied anywhere on the body*
- Support gut, immune and microbiome health*
- Be naturally effective for several days*
- Be ideal safe and effective natural preservatives*
- Be carriers for certain biological molecules*
