

VeraCell™ DEFEND. REPAIR. RENEW.

Build the immune system
your future depends on.†

Daily immune support designed to help
your body respond smarter, recover stronger,
and stay resilient for the long run.†

YOUR IMMUNE SYSTEM IS MORE COMPLEX THAN YOU THINK...

Chronic stress. Poor gut health. Inflammation. Slow recovery. These all have the same root: an immune system that's reacting, not optimizing.

The challenge of immunity isn't fighting germs. It's making sure you're giving your immune system the proper nutrients to make it thrive and right now, your immune system is starving.

Your body already knows how to optimize immunity but it needs the nutrition to do so. Unfortunately, modern diets don't allow our systems to function properly. Fortunately,

VeraCell™ contains 5 targeted compounds that help correct this and optimize our immune system.

The ingredients in VeraCell™ are responsible for a specific roles in gut and immune health. Because when these systems work together, your immune system is optimized.

NON-TOXIC

PLANT-BASED

BACKED BY NATURE

5 TARGETED COMPOUNDS IN VERACEL™

Five prebiotic and barrier-support compounds that feed your body's gut-immune foundation.

ACEMANNAN

(Aloe vera inner gel)

- + Supports a healthy immune cell activation via pattern recognition receptors (CD206)[†]
- + Serves as a prebiotic substrate for beneficial gut bacteria[†]
- + The only ingredient in the formula that is both prebiotic and immune-active[†]

N-ACETYL-D-GLUCOSAMINE (NAG)

- + Amino sugar your body uses for mucin synthesis, the structural glycoproteins that form your gut mucosal barrier[†]
- + Supports gut lining maintenance[†]

FUCOIDAN

(Brown seaweed)

- + Helps modulate the immune system
- + Provides antioxidant cell protection
- + Helps maintain your guts protective mucosal lining

ARABINO GALACTAN

(Larch tree)

- + Prebiotic that nourishes beneficial gut bacteria
- + Supports balanced immune responses
- + Supports the growth of multiple strains of beneficial gut bacteria

GUM ACACIA

(Fiber)

- + Supports healthy digestion
- + Helps support the growth of beneficial bacteria
- + Provides soluble dietary fiber that supports regularity

SUPPLEMENT FACTS

Serving Size: 1 scoop (2 g), twice daily
Servings per Container: 60

	AMOUNT PER SERVING
Acemannan (Aloe inner-leaf; High Acetylation)	200mg*
Larch Arabinogalactan	750mg*
Gum Acacia Fiber	750mg*
Fucoidan	100mg*
N-Acetyl-D-Glucosamine (VEGAN)	150mg*

OTHER INGREDIENTS: Rice Fiber (Ground Rice Hulls)

*Percent Daily Values are based on a 2,000 calorie diet.

[†]Daily Value not established.

HOW VERACELL™ WORKS

ACTIVATES CLEANUP

Acemannan supports macrophages — your body's immune cleanup crew — helping clear damaged cells and debris.

BALANCES THE RESPONSE

Fucoidan and acemannan help regulate immune signaling so inflammation resolves appropriately — not too much, not too little.

SUPPORTS REPAIR

NAG provides essential building blocks for tissue restoration and cellular recovery.

THE RESULT

- + Fewer inflammatory stressors
- + Improved cellular cleanup
- + Stronger repair capacity
- + Restored cellular balance
- + A smarter, stronger immune foundation

VeraCell™ has five targeted compounds - three prebiotic fibers and two barrier-support nutrients, working together across your gut-immune foundation.

+ GUT SUPPORT

Feeds beneficial microbes and supports healthy intestinal function.†

+ IMMUNE STRENGTH

Helps your natural defenses respond appropriately to everyday stressors.†

+ GUT-BRAIN CONNECTION

Your gut and your brain talk to each other through the vagus nerve. A healthy gut sends better signals.†

+ BARRIER INTEGRITY

Supports the gut lining, your body's barrier between your digestive tract and your blood stream.†

STARTS IN THE GUT

Nearly 70% of your immune system lives there. VeraCell™ delivers targeted nutrients exactly where immune communication begins.

FEEDS THE GOOD

Arabinogalactan nourishes beneficial bacteria — supporting the signals that keep your immune system informed and responsive.

STRENGTHENS THE BARRIER

N-Acetyl-D-Glucosamine (NAG) helps reinforce the gut lining — reducing inflammatory triggers before they escalate.

This product is not intended to diagnose, treat, cure, or prevent any disease. Individual results may vary. This product is intended to be used in conjunction with a healthy diet and regular exercise.

ALLERGEN INFORMATION: VeraCell™ contains fucoidan derived from brown seaweed. Consult your healthcare provider before use if pregnant or nursing.

FACTS ABOUT ACEMANNAN (THE ACTIVATOR)

- + A bioactive polysaccharide extracted from the inner gel of the Aloe Vera plant.
- + Since 1999, 250 million servings of acemannan nutrition have been given in 90 countries.
- + Our Acemannan is a second-generation extract containing 4x more bioactive acemannan fractions per gram than standard acemannan extracts.
- + Biological potency depends on preservation of its acetylated structure.
- + Supports your body's natural tissue repair and recovery.†
- + The structural source behind resilient cells.
- + Promotes immune modulation - not overstimulation.
- + Your body uses macrophages to identify and clear damaged cells. Acemannan provides nutritional support for this natural process.†
- + Studied for immune resilience and cellular protection.

HOW TO TAKE VERACELL™ AND WHAT TO EXPECT.

WHAT NOT TO OVERTHINK IT'S POWDER. THAT'S IT.

Very fine. Virtually no taste. You'll barely know it's there — which is the point.

THINGS TO KEEP IN MIND

WHAT TO MIX IT WITH.

Water, juice, smoothies, milk, yogurt, kefir, coconut water, or plant-based milks — whatever fits your routine. Fermented options like yogurt and kefir pair especially well: they bring the live cultures, VeraCell brings the prebiotic fibers those cultures feed on. Skip hot liquids, carbonated drinks, and alcohol.

CLUMPING HAPPENS.

You may notice some clumping. Acemannan is hygroscopic, meaning it pulls moisture straight from the air. Those little clumps mean the polysaccharide structure is intact.

DRINK WATER.

Fiber absorbs water — that's its entire mechanism. It forms a gel that softens everything and keeps things moving. We recommend drinking 6–8 oz of water when taking VeraCell™.

KEEP IT SEALED.

Store in a cool, dry place. The pantry is ideal. Keep out of direct sunlight.

KEEP IT BELOW 140°F.

Acemannan's molecular structure begins breaking down above 140°F. By 180°F, you've turned a bioactive polysaccharide into expensive fiber.

TEST: If it's too hot for your mouth, it's too hot for VeraCell™.

HOW TO ENJOY:

TAKE 15-20 MINUTES BEFORE MEALS, TWICE DAILY.

MORNING: Pair your first scoop with something you already do — coffee, breakfast, the morning routine. The goal is an anchor you won't skip.

EVENING: Same idea for your second scoop. Dinner, post-workout, evening wind-down. Splitting the dose across the day keeps a steady supply of prebiotic fiber reaching your gut bacteria.
