

Swish30

Swish30 Product overview

A performance blend of nano nutrients delivered in seconds

Gone are the days of waiting months to see results from supplementation! We have set out to disrupt the health industry through rapid absorption of key ingredients through our HydraStat technology. Nanosized ingredients are the way of the future, and we are the trailblazers!

Superior absorption through Hydrastat Nanotechnology

Using proprietary HydraStat technology, the makers of Swish30 have nanosized its active ingredients to nanoparticle sizes that become bioavailable within seconds by oral "swishing" for thirty seconds or longer and then swallowing. Fragile ingredients like Glutathione have been expensive to get into the bloodstream -- until now. With our technology glutathione and other key ingredients are affordably available.

Key Ingredients

Glutathione is the body's master antioxidant that impacts nearly every function in your body. It detoxifies your body's cells and it also recycles itself to increase the effectiveness of other antioxidants (Vitamins C, D, etc).

Curcumin acts as an antioxidant, fortifies mental health and clarity, offers joint support, and may improve heart health.

L-Cysteine is an anti-inflammatory that boosts heart health, supports the immune system, and boosts athletic performance.

Ultra Pure Water is crucial to our nanotechnology formulation. We remove all impurities and the non dissociated colloidal matter, gas and organic matter in the water to a very low level. Pure water is measured by Megohms of resistivity to electrical current. The use of ultra-pure water in industry includes pure water as a rinse bath for computer chip manufacturing. The theoretical maximum is 18.2 megohm. Our use includes ultra-pure water with a "cleanliness" of over 17.5 megohm.

Product Benefits

- ◇ Increased Energy
- ◇ Immune Support
- ◇ Joint Support
- ◇ Increased Focus and Clarity
- ◇ Increased Endurance
- ◇ Rapid Recovery
