

ORAC CELL SAP STUDY

HYDROXYTYROSOL IS A POLYPHENOL FROM THE OLIVE TREE WITH THE STRONGEST POWER IN THE FIGHT AGAINST FREE RADICALS. ORAC stands for Oxygen Radical Absorbance Capacity, which loosely translated means oxygen radical absorption capacity. This means the ability to neutralize free radicals, which is basically the property of antioxidants.

| Compounds | ORAC* |
|--|--------|
| Hydroxytyrosol (in olive leaf cell elixir) | 27,000 |
| Oleuropein (in olive leaf cell elixir) | 12,000 |
| Grape Seed Extract | 6,200 |
| Ascorbic Acid (Vitamin C) | 2,100 |

Data provided by Brunswick Laboratories, Wareham, MA.
Brunswick Laboratories specializes in measuring the antioxidant activity of natural compounds.
