

# PETS PLUS<sup>+</sup>

## Frequently Asked Questions

Pets Plus+ is here! We are so thrilled we finally get to share this incredible product with you, and most importantly, your pets. They are part of your family, and now, the Solex family.

We have compiled a list of frequently asked questions to help you learn more about this incredible product. If you have any additional questions about Pets Plus+, please email us at **[support@solexllc.com](mailto:support@solexllc.com)**, and we will include your questions on future FAQs.

## ① What are Pets Plus+ main ingredients?

Pets Plus+ is an all-natural, concentrated combination of the following ingredients:

- Silicon dioxide (diatomaceous earth)
- Kaolin
- Reed-sedge peat
- Purified water
- Active dry yeast
- Brewers dried yeast
- Organic sugar cane molasses
- Organic mineral powder
- Sea salt
- Naturally occurring enzymes

We love researching and learning, and we especially love to share that knowledge with our customers! We will continue to share reliable, cited research to help our customers learn about the importance of these ingredients. Stay tuned for educational tools and materials we will be sharing about the ingredients in this incredible product!

## ② How do you administer Pets Plus+ to your pet?

Pets Plus+ comes in single-serve, 2-ounce (oz.) packets. All you need to do is sprinkle it over your pet's food. It's as easy as that!

As with any new food or supplement you introduce to your pet, we suggest starting off slowly. You may want to consider giving half a dose for the first few days (no matter the weight of your pet) to help it acclimate.

If desired, you can mix it in your pet's water. Pets Plus+ is not water-soluble, but if that is the easiest way for your pet to consume Pets Plus+ and get it into their system, then go for it!

## ③ What are the benefits of Pets Plus+?

Pets Plus+ is created from high quality ingredients to promote the following benefits in your pets:

- Fur/hair growth\*
- Cleanses and supports a healthy digestive system\*
- Improves cholesterol, heart, and bone health\*
- Boosts immune system\*
- Aids in metabolism and cellular maintenance\*
- Promotes skin, nail, and eye health\*
- Regulates blood pressure\*
- Helps repel fleas and ticks\*
- Helps transmit nerve signals\*
- Great source of vitamins and antioxidants\*

## ④ Which animals can use Pets Plus+?

Pet Plus+ was designed around the needs of most common animals; dogs, cats, and even horses! However, there are no restrictions on which animals can consume Pets Plus+. What we do want to emphasize, and want you to keep in mind, is the size of the animal.

For example, if you have a small pet such as a hamster or a bird, please pay attention to the dosage. The recommended dosage suggests to give one individual packet to an animal that is 50 pounds (lbs) or less. If your pet is very small, you may only use half of the packet or less, depending on the size of your pet. If you have a bigger pet, you may want to up the dosage.

\*These statements have not been evaluated by the FDA. This product is not intended to diagnose, treat, cure, or prevent any disease.

### ⑤ **Is Pets Plus+ organic?**

Yes! Pets Plus+ is an all-natural, concentrated combination of enzymes derived from a unique blend of naturally occurring, non-GMO beneficial lactic acid bacteria sources and beneficial yeast. Pets Plus+ is also produced through natural fermentation and a pure water reed-sedge peat-leaching process.

### ⑥ **How many packets are in a bag?**

There are 30 individual packets in Pets Plus+. Each packet contains 2-ounces (oz.) of product. For the average pet, it is estimated to be a month supply. The key phrase here is “one a day for 30 days.” (Please keep in mind this only applies to the average pet --smaller or larger pets will need to reduce or increase serving size, respectively).

### ⑦ **Can Pets Plus+ be added on the Pet Library of the AO Scan Technology Program?**

Not at this time. Supplement Library for pets is currently not available. However, our technology is always developing and improving. We hope to add as many features as possible on the new Pets Plus scan, such as the Pet Supplement Library.

### ⑧ **How often should your pet have Pets Plus+?**

As mentioned previously, Pets Plus+ comes in single servings. For the average pet, you will only need to use one packet a day. If the size of your pet is larger, for instance, if your dog weighs 100 pounds (lbs.) or more, you may use one packet in the morning and another one at night to ensure it received the full benefits of this product.

### ⑨ **Does Pet Plus+ come in powder or liquid form?**

Pets Plus+ comes in powder form to best facilitate the combining process of Pets Plus+ and your pet's food.

### ⑩ **Is Pets Plus+ considered a supplement only to be taken occasionally?**

No, Pets Plus+ is designed to be used daily to optimize your pet's health and wellness.

### ⑪ **What does Pets Plus+ taste like? What flavor is it?**

Pets Plus+ has a flavor that your pets will love! It contains natural flavoring from carrots and beets, which blends perfectly with your pets' food.

### ⑫ **Where can I get more info about Pets Plus+ ?**

We will be constantly sharing information about Pets Plus+ in the back office and on our Weekly Update calls. As mentioned earlier, if you have any questions about Pets Plus+ that are not yet included on this FAQ document, please email us at [support@solexllc.com](mailto:support@solexllc.com) and we will answer your questions on future FAQs.

### ⑬ **Is Pets Plus+ available for autoship?**

Yes, it absolutely is! The autoship pricing for Pets Plus+ is \$20.
