HERE'S HOW ZENDAAS WORKS

1

CUSTOMERS ORDER FROM YOUR RESTAURANT

Customers order from your app, website, or third-party delivery service (such as DoorDash, UberEats, GrubHub, etc.). You are charged one flat fee per delivery of \$2.99 from ZenDaas*.

2

YOUR ZENDAAS SYSTEM DISPATCHES DRIVERS

You connect your online ordering system to ZenDaas, and a driver is dispatched to your restaurant.

3

ZENDAAS HANDLES THE REST

Confirmation texts, delivery times, and more are all handled by ZenDaas. We handle all of this from "behind the curtain," so your customers know nothing more than dinner is on the way!

BUSINESS AS USUAL

We can't stress this enough! There is little to no-risk with ZenDelivery as your third-party administrator. It's "business as usual," you continue to fulfill your delivery orders just as you are now, but with significantly lower fees!

LOWER FEES WITH SELF-DELIVERY

Contact your third-party delivery service (DoorDash, UberEats, GrubHub, etc.) and ask to modify your contract to include restaurant self-delivery.

This modification should reduce your fees from approximately 25% to 12%. Some restaurants (depending on volume) save even more! If needed, your ZenDelivery Agent can assist you with modifications to your contract.

IT'S OK IF YOU DON'T HAVE YOUR OWN DRIVERS

Once your contract modification is processed, you now have the ability to deliver on your own. But what happens if you need a delivery fleet or technology to handle self-delivery? That's where ZenDelivery steps in! We offer drivers through a national driving database that serve as a personal delivery fleet for your restaurant—no additional cost for this service.

*Plus reduced contracted rates with your third-party administrators as indicated in your contracts. See self-delivery option.
