MY CONTACT INFO

Managing payment processing services can be a tricky proposition for any business owner. At ZenDelivery, we specialize in connecting merchants with bank merchant accounts and offer various processing options, including high-risk merchant accounts. If you have had problems opening a merchant account or are tired of the high processing fees, we are here to help.

We offer two options that can help you immediately start saving on your processing:

Traditional Merchant Processing Save up to 15%

Our traditional merchant processing option guarantees 15%* savings on your current processing. (*Percentage based on current processing volume)

Cash Discount Program Zero Restaurant Fees

Our cash discount program encourages customers to pay in cash by offering them a discount. For those who choose to use a credit card or debit card, our program passes the cost of acceptance back to customers allowing you, the business owner, to continue accepting all major credit cards without losing 3-4% in fees!
